

I am sending this E-Mail in reference to the Telephone Consumer Protection Act.

I think it is very important for New Jersey's DO NOT CALL law to stay in tact and that it should not be overturned. I am finally able to enjoy my time at home without being bothered by people / companies I do not want to do business with. If I want to do business with a company or individual, I will call them.

The law should be strengthened to eliminate all political telemarketers also. Do what the people of New Jersey want not the special interest groups want, PUT US FIRST FOR A CHANGE.
